BASIC NEEDS AND RESOURCES

INTERNATIONAL CHARITY **OPTION FOUR:**

HOPE INTERNATIONAL DEVELOPMENT AGENCY UK

FOCUS: Meeting basic needs for self-sufficiency

ISSUE: The lack of foundational resources in rural communities. They work with some of the most remote and marginalised people who lack reliable access to clean water, food, and medical care, which are all essential to escaping poverty.

MISSION: Helping the "neglected poor to help themselves." Their mission is to enable self-reliance by providing access to clean water, food security, and basic healthcare. They believe these are the foundations people need to build a better life and become self-sufficient.

MAIN AREAS OF WORK: Ethiopia

SPECIAL FEATURES: Clean water as a catalyst for development. They have a strong emphasis on clean water projects, understanding that a single, functioning well can transform a community's health and productivity. This one basic need unlocks the potential for all other forms of development.
